Development Process

● Environment & SPA Development

The screenshot shows the Postman application interface. The top navigation bar includes 'New', 'Import', 'Runner', 'School Projects' (with a dropdown menu), 'Invite', 'Upgrade', and various icons. The main area shows a 'Collections' tab selected, with a 'nomit_restapi_express' collection expanded, containing 18 requests. A specific GET request to `((url))/api/skills?&s=chef` is selected. The 'Params' tab shows a parameter `s` with value `chef`. The 'Body' tab displays the JSON response:

```
[{"name": "banquet chef"}, {"name": "certified personal chef"}, {"name": "chef de cuisine"}, {"name": "chef de froid"}, {"name": "chef de partie"}, {"name": "chefs and head cooks"}, {"name": "executive chef"}, {"name": "head chef"}]
```

Development Process

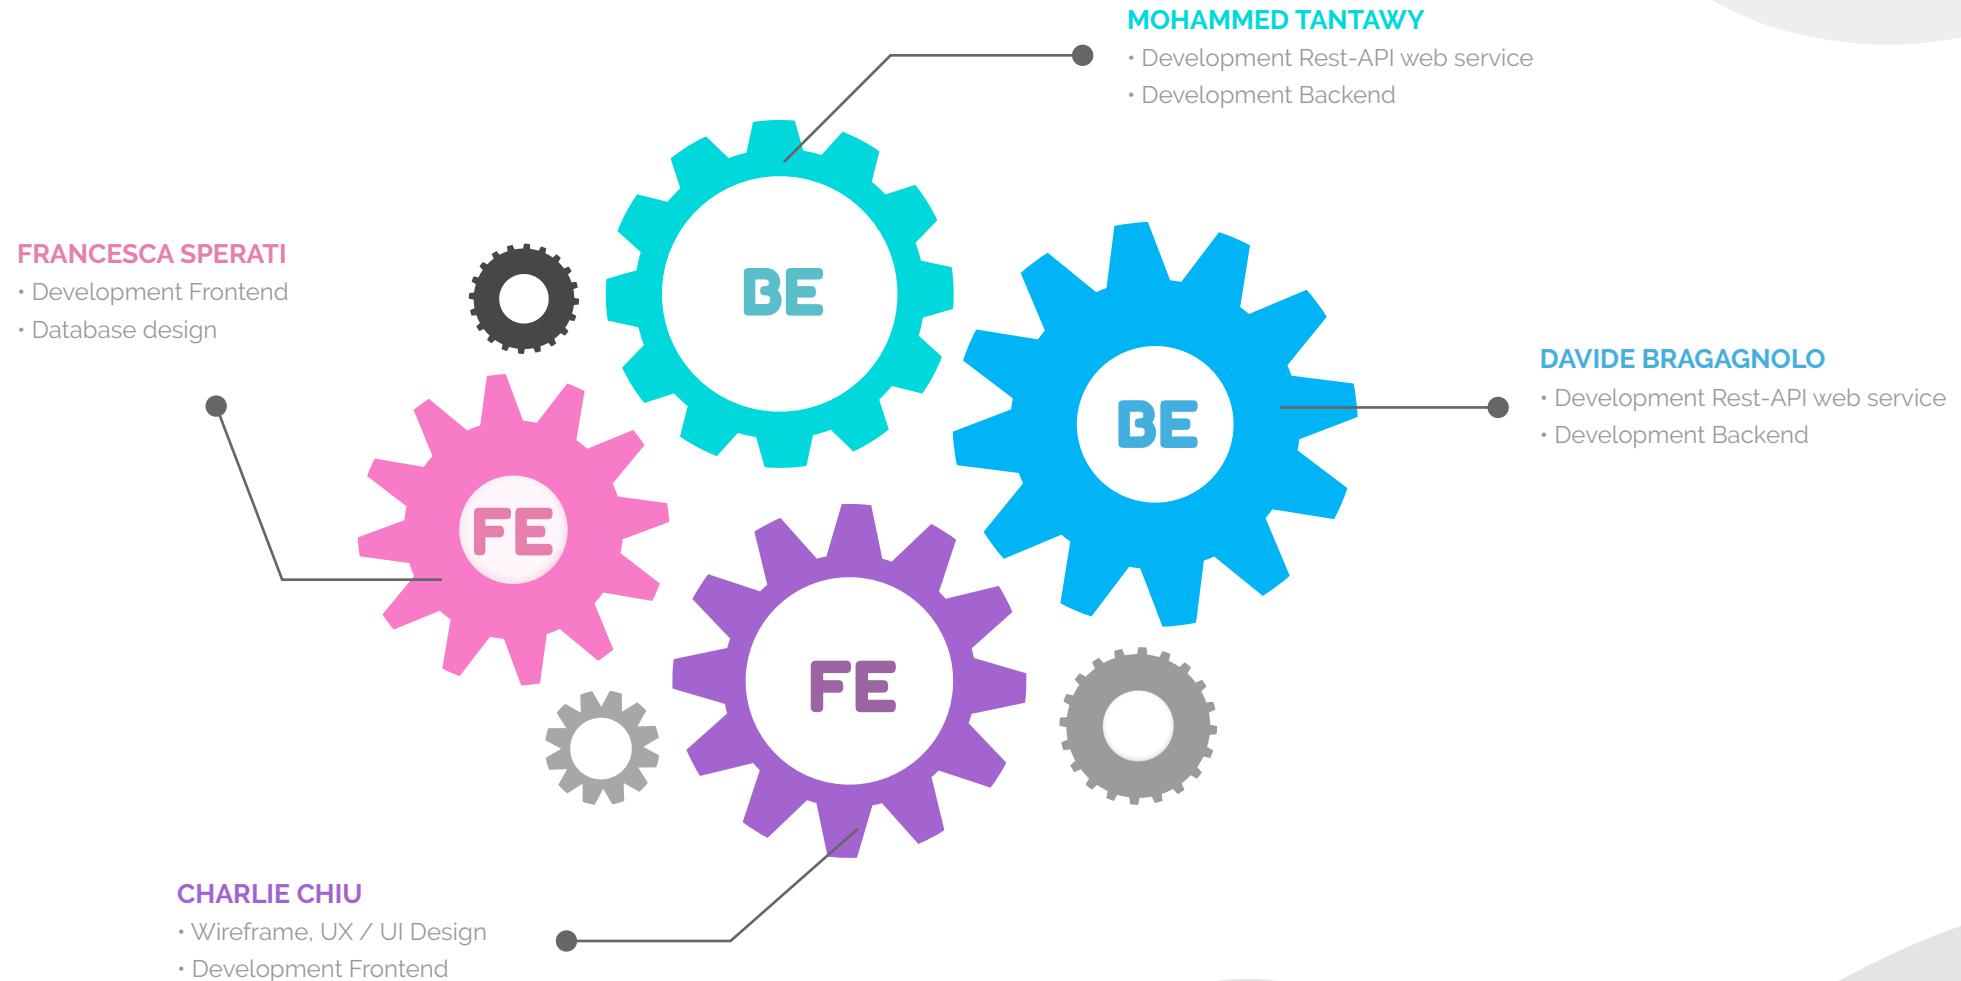

● Environment & SPA Development

The screenshot shows the Heroku dashboard for the `nomitwisp-restapi` application. At the top, there's a navigation bar with the Heroku logo, a search bar, and links for Personal, GitHub (ExtProjNomit/Nomit-RestApi), and master branch. Below the navigation is a menu with Overview, Resources, Deploy, Metrics, Activity, Access, and Settings.

The Metrics section displays three charts: Response Time (247 ms), Throughput (< 1 rps), and Memory (11 %). The Latest activity section lists seven deployment events by user 6678@ait.nsw.edu.au, each with a timestamp and a link to compare diff or view build log. The Installed add-ons section shows Heroku Redis (Hobby Dev tier) and mLab MongoDB (Sandbox tier). The Dyno formation section indicates the app is using hobby dynos at \$7.00/month.
